@ The varieties in this table are arranged and ranked in descending order according to the average yield across six locations. Within locations the varieties are ranked in descending order according to their yield. Varieties were replicated at the Gates location. Testers were utilized at the Camden, Currituck, and Perquimans locations. Freeze damage was observed at the Currituck location.

* The average for six locations includes the Camden, Chowan, Currituck, Gates, Pasquotank, and Perquimans sites.
